

## Nexys Token Instructions

Nexys is building a community of people who want to help the planet. The Nexys token is a cryptocurrency that helps power the Nexys app.

To receive your Nexys token distribution, please take the following steps:

1. Get an Ethereum compatible cryptocurrency wallet. MetaMask is the most popular.
2. Back up your key phrase at password for your wallet. To repeat, make sure you back these up in multiple places. As with all crypto, if you lose your keys, your crypto is lost forever.
3. In MetaMask, enable the Base Network. If you need help with this step, there are multiple YouTube videos that can show you how to do it for your wallet. It just takes a few seconds.
4. While in the Base Network in MetaMask, select import token, and then select custom token.
5. Insert the Nexys token contract shown below, and it will bring up the Nexys token.

6. Select the Nexys token and your wallet will be ready to receive Nexys Tokens.
7. Download the Nexys app from the Apple Store or Google Play.
8. Sign up and log into the Nexys app
9. Complete your profile
10. Select Nexys Tokens from the upper left drop-down menu in the Nexys app.
11. Enter your information and wallet address on the pop-up screen and submit.
12. Close out of that screen and join the Nexys Token Project group for updates.

Your tokens will be distributed shortly after receipt of your submission.

Please share the Invite Friends link in the upper left drop-down menu of the app.

Once you receive your tokens, you will be able to confirm your transactions on BaseScan.org:
